## **[LearningList.com](http://LearningList.com) Releases Independent Reviews of Adaptive Curriculum Products, Grades K-8, Biology, Chemistry, Physics, and Integrated Physics and Chemistry**

Austin, Texas — Learning List, a K-12 instructional materials review service for educator and parents, releases reviews of Adaptive Curriculum Products for Grades K-8, Biology, Chemistry, Physics, and Integrated Physics and Chemistry.

The reviews on [LearningList.com](http://LearningList.com) help educators and parents understand which instructional materials and online courses will work best for their students and how to use products most effectively.

LearningList.com features three types of reviews for Texas state-adopted Products

- (1) A link to the state review panel's independent evaluation of each product's alignment to the TEKS and alignment percentage;
- (2) An [editorial review](#) highlighting the key features that distinguish our science products from other state-adopted and non-adopted products;
- (3) [Subscriber ratings and reviews](#) where educators and parents who have used our products can share their experience with others.

"Every day, teachers and administrators tell us how instructionally engaging our content is and how well it supports classroom learning," said Lori Hershman, Director of Education Solutions for Adaptive Curriculum, "Having a respected independent organization such as Learning List review our product with such similar positive feedback, provides tremendous product validation."

"We are delighted that Adaptive Curriculum had the confidence to submit their products for our independent review and greatly enjoyed working with them. I know that schools and districts across the country will appreciate the opportunity to learn more about these materials" said Jackie Lain, president and founder of Learning List.

### **About Learning List**

Learning List is professional resource review service that empowers educators and parents nationally to select the right K-12 instructional materials and online

courses for their students. Subscribers may access Learning List's online library of completed reviews, may request that publishers submit additional products to Learning List for review, and may submit open-source instructional materials for review. Tools on LearningList.com make it easy to identify, compare and select the K-12 instructional materials that meet students' unique needs. The website also helps subscribers document compliance with laws, regulations and grant requirements governing the selection of instructional materials.

### **About Adaptive Curriculum**

Designed for grades 5-12, Adaptive Curriculum's web-based math and science solutions are used by more than 3 million students in the United States, Europe and Asia. The interactive instruction is designed for digital learners and helps schools bridge the gap between the old way and the new way of learning. The results are improved, deeper comprehension, increased test scores, and a student body ready to compete in the global economy. Adaptive Curriculum shares the vision of innovation through a partnership with Arizona State University Technology Based Learning and Research group headquartered in Skysong, the ASU Scottsdale Innovation Center. Adaptive Curriculum is part of Sebit Inc., a global eLearning company and a leader in digital curriculum innovation.
