FOR IMMEDIATE RELEASE

ADAPTIVE CURRICULUM'S WEB-BASED CONCEPT MASTERY SOLUTION SELECTED AS AN EDUCATION FINALIST IN THE 2013 SIIA CODiE AWARDS

Adaptive Curriculum earns industry recognition in the Best Virtual Learning Solution category

Scottsdale, Ariz. — April 3, 2013 — Adaptive Curriculum (AC), a web-based concept mastery solution that strengthens math and science performance by helping students build a deep understanding of core concepts and skills, has been named a finalist in the 2013 CODiE Awards in the Best Virtual Learning Solution category. Sponsored by the Software & Information Industry Association (SIIA), the prestigious CODiE Awards have been recognizing product excellence for more than 27 years.

Adaptive Curriculum is one of seven finalists for the award for Best Virtual Learning Solution. Winners will be announced during a special awards dinner at the Ed Tech Industry Summit in San Francisco on May 6.

"We're honored to be recognized by educators and administrators who are looking for virtual learning solutions that are making a difference for students with diverse learning styles and abilities, and for educators in diverse educational settings," said Jim Bowler,

CEO of Adaptive Curriculum. "Adaptive Curriculum easily adapts to any instructional setting, including traditional, virtual and home schools, to improve students' concept mastery in math and science. It can be used for self-paced individualized instruction, small group or whole class instruction, or as a teacher presentation tool to give schools maximum flexibility. This recognition in the virtual learning category is extremely gratifying because it emphasizes our commitment to meeting students in the digital realm to be sure they are ready for the real world."

The SIIA CODiE Awards are the industry's only peer-reviewed awards program. Educators and administrators conducted the first-round review of all education nominees and selected the CODiE Awards finalists. SIIA members will now vote on the finalist products. The scores from both rounds will be tabulated to select the winners.

Designed for grades 6-12, Adaptive Curriculum engages digital-age learners by integrating real-world scenarios, cutting-edge graphics, animations, 3D models and interactive simulations into active, standards-based learning. Unlike textbooks or drill-and-practice programs, Adaptive Curriculum's active learning approach motivates learners to explore, make hypotheses, manipulate items and see the impact of their decisions, thus developing and deepening their conceptual understanding.

About Adaptive Curriculum

Designed for grades 6-12, Adaptive Curriculum's web-based math and science solutions are used by more than 3 million students in the United States, Europe and Asia. Across the world, experts in math, science and online learning theory contribute to the content and design of the interactive activities to deliver effective instruction that improves performance on high-stakes tests and enhances college and career readiness.

Adaptive Curriculum is part of Sebit Inc., a global eLearning company and leader in digital curriculum innovation. For more information please call 1-888-999-9319 or visit www.adaptivecurriculum.com.
