***Adaptive Curriculum* Named CODiE Awards Finalist in Two Categories**

Product Nominated as “Best Science Instructional Solution” and “Best Online Instructional Solution”

SCOTTSDALE, ARIZ. (March 2, 2009) – The Software & Information Industry Association (SIIA) has named *Adaptive Curriculum* a 2009 CODiE Awards finalist in two categories: “Best Science Instructional Solution” and “Best Online Instructional Solution.” Established in 1986, the CODiE Awards celebrate outstanding achievement and vision in the software, digital information and education technology industries.

Combining conceptual learning with state-of-the-art visualization, *Adaptive Curriculum* provides teachers with an interactive way to engage middle-grade students in learning mathematics and science. *Adaptive Curriculum* offers more than 200 Math and Science Activity Objects aligned to national and state standards, allowing students to participate in virtual experiments, scientific inquiry exercises, and problem-based learning to increase their critical thinking skills.

According to SIIA President Ken Wasch, “The competition is particularly steep this year during the 24th Annual SIIA CODiE Awards, making selection as a finalist a real achievement.” Wasch further added that “All the companies on this year’s list of CODiE finalists should feel justifiably proud of their accomplishment in making it to this stage, and have much excitement to look forward to regarding the upcoming CODiE Awards voting.”

The CODiE Awards hold the distinction of being the only peer-recognition awards program in the industry, providing a unique opportunity for companies to earn the praise of their competitors. This year, more than 850 nominations were submitted by 600 companies, from which 345 distinguished finalists were selected by a panel of expert judges.

The 24th Annual CODiE Awards will be presented at a gala event on May 5, 2009 in San Francisco.
