Sebit, LLC Earns 2009 BESSIE Award for *Adaptive Curriculum*

Online Learning System Recognized as Best Middle School Math and Science Website

SCOTTSDALE, ARIZ. (April 14, 2009) – Sebit, LLC has been honored with a 2009 BESSIE Award for its online learning system *Adaptive Curriculum*. For 15 years, the Best Educational Software (BESSIE) Awards have been presented by ComputED Learning Center, targeting content-rich programs and Web sites that provide teachers with the technology to foster educational excellence.

Adaptive Curriculum enhances learning in math and science for students in the middle grades. The online learning system offers Activity Objects that package educational content as single-topic, interactive segments for use in a variety of learning environments. With realistic, engaging visuals, Activity Objects enable students to participate in virtual experiments, guided inquiry, and problem-based learning that helps them gain the skills necessary to excel in math and science.

“As more schools and districts across the county are discovering the value of *Adaptive Curriculum*, this recognition validates and confirms the success that so many educators are experiencing,” said Pat Walkington, Vice President of Sales and Marketing for Sebit. “The fact that *Adaptive Curriculum* has been awarded two consecutive awards from ComputedEd Learning Center shows that the education technology community is recognizing *Adaptive Curriculum* as both an engaging and effective tool.”

The winners for this year’s BESSIE Awards were selected from titles submitted by software publishers around the world. Products were chosen based on academic content, potential for broad classroom use, technical merit, subject approach, and management system.

The *ComputED Gazette* is the sponsor of two annual software awards programs, the Education Software Review (EDDIE) Awards and the Best Educational Software (BESSIE) Awards, and is published by the ComputED Learning Center, San Diego’s leading computer educator resource. *Adaptive Curriculum* earned an EDDIE Award in 2008.
