***Adaptive Curriculum* Named “Best Online Instructional Solution”**

Sebit Earns Back-to-Back CODiE Award Honors from Software & Information Industry Association

SCOTTSDALE, ARIZ. (May 7, 2009) – *Adaptive Curriculum* earned the “Best Online Instructional Solution” CODiE Award, the second recognition for Sebit, LLC, in the past two years from the Software & Information Industry Association (SIIA). Each year, the association honors the industry’s best software, digital content and education products for their outstanding impact. Last year, Sebit received the “Education Newcomer of the Year” CODiE Award.

“Now, more than ever, information technology is playing a vital role in fostering American innovation and providing a powerful economic engine,” said SIIA President Ken Wasch. “Not only should we congratulate these winners, we should keep a close eye on them. These are the products and businesses that will help ensure our country maintains its leadership in the global information economy.”

Combining conceptual learning with state-of-the-art visualization, *Adaptive Curriculum* provides teachers with an interactive way to engage middle-grade students in learning mathematics and science. *Adaptive Curriculum* offers more than 200 Math and Science Activity Objects aligned to national and state standards, allowing students to participate in virtual experiments, scientific inquiry exercises, and problem-based learning to increase their critical thinking skills.

The CODiE Awards hold the distinction of being the only peer-reviewed awards program in the industry, providing a unique opportunity for companies to earn the praise of their competitors. This year, more than 850 nominations were submitted by 600 companies, from which 345 distinguished finalists were selected by a panel of expert judges.

The 2009 CODiE Awards were presented at a gala event held on May 5 in San Francisco.
