

Response to Intervention (RTI)

Tier 3: Intensive Intervention

Gen. Ed Teacher, Special Ed and/or Specialist implements scientifically research-based (SRB) instructional strategies:

- Designed to accelerate learning
- Increased frequency and duration of interventions
- Individual or small group
 - Uses diagnostic data to precisely target student needs
 - Detailed modeling and demonstration of skills
 - Extensive opportunities for guided practice
 - Increased opportunities for error correction and feedback

Adaptive Curriculum's RTI Solution

Tier 3: Accelerated Learning

- Adaptive Curriculum accelerates learning by providing instruction at students' skill set
- Lessons can be done at any time for any length of time
- Opportunity for small group or 1:1 correspondence
- Activity Objects are assigned according to targeted student needs
- Interactive activities and exploration provides detailed modeling, demonstration and extensive guided practice
- Guided practice opportunities with online and/or teacher guided instruction
- Hands-on interactive activities allow for student collaboration providing feedback and error analysis

Adaptive Curriculum's award winning instructional solution builds middle and high school math and science mastery through dynamic, interactive learning.

Tier 2: Strategic Intervention

Gen. Ed Teacher and/or Specialist implements scientifically research-based (SRB) instructional strategies:

- Supplements Tier I instruction
- Deficits are pinpointed and addressed
- Small groups
 - May occur in classroom or other setting
 - Time and intensity of instruction increases
 - Increased progress monitoring

Tier 2: Supplemental Instruction

- An effective supplement used for additional instruction and time on task
- Instruction on identified needs is customized through the activities within the Activity Objects
- Flexible grouping allows for small groups with detailed attention to individual student needs
- Curriculum is flexible and accessible in multiple environments
- Activity Objects are assigned based on student deficits, allowing additional time and instruction on difficult concepts

Well aligned to support Response to Intervention (RTI), Adaptive Curriculum offers more than 1,000 learner outcomes created to:

- Incorporate rich multimedia and real-world scenarios
- Engage today's digital-age learners and promote active learning
- Provide the latest proven research in lesson design and effective instruction

Tier 1: Core Instruction

Gen. Ed Teacher implements scientifically research-based (SRB) instructional strategies:

- Flexible grouping
- Differentiation with Core content
 - Alignment of core curriculum to state content standards
 - High-yield instructional practices

Tier 1: Supports Core

Teacher incorporates flexible grouping through:

- Engaging interactive concept introduction delivered to whole groups
- Small groups collaborating on an activity sheet
- Independent practice
- Differentiated instruction through interactive, dynamic Activity Objects by incorporating different learning modalities

Activity Objects aligned to:

- CORE, State standard/NCTM and NSTA and Textbooks
- Built-in assessments monitor understanding of instructed concepts
