Adaptive Curriculum renews its partnership with Santillana Chile

Santillana continues to offer Adaptive Curriculum and Vitamina as part of their content offering to its students in Chile.

SCOTTSDALE, AZ – February 25, 2018 - Adaptive Curriculum, a leading math and science technology company announces its continued partnership with Santillana, offering Adaptive Curriculum and Vitamina Science and Math content in Chile, as part of their educational technology solutions and interactive content offerings. Santillana is the leading educational content publisher in Latin America.

Adaptive Curriculum and Santillana have integrated Adaptive Curriculum’s Activity Objects with Santillana’s Compartir platform. With this integration, Santillana teachers and students are now able to include Adaptive Curriculum’s interactive Activity Objects as part of their learning cycle through their learning management system.

Designed for grades 6-12, Adaptive Curriculum’s Activity Objects engage digital learners by integrating real-world scenarios, cutting-edge graphics, animations and 3D models as well as interactive simulations into active, standards based learning. Unlike textbooks or drill and practices programs, Adaptive Curriculum’s active learning approach motivates learners to explore, make hypotheses, manipulate items and see the impact of their decisions, thus developing and deepening their conceptual understanding.
