Company Fact Sheet

Overview

Adaptive Curriculum develops standards-based online Math and Science software for grades 5-12, using an interactive pedagogy to engage today's students with online lesson plans to support effective teaching.

Mission

The Adaptive Curriculum mission is to inspire students with active online learning, engage them in Math and Science concept mastery, and motivate them to succeed.

Pedagogical Approach

Online Math and Science Activity Objects, Animations and Interactive 3D Models use a highly visual approach and the 5E research-based pedagogical model: Engage, Explore, Explain, Elaborate and Evaluate.

Research Partnership

Adaptive Curriculum partners with Technology Based Learning and Research (TBLR) at Arizona State University on curriculum alignment, classroom implementation, and professional development services.
